BAE - Documentation plan

The Vaccinators

Cedric De Schepper, Thanh Danh Le,
Wannes Marynen & Stijn Vissers

March 2019

1 Paper

The paper will be written by the whole group and checked by Cedric. The first versions will be developed for each part by separate group members so that the text will be written by someone who did the test and the simulations. This will ensure that the explanation of the data that we collected is interpreted with a correct view. After this step the complete paper will be checked on inconsistencies and incomplete parts by Cedric to form one coherent result.

2 User manual

The user manual will be developed by the maker of the feature and then will be reviewed by the at least one other member of the group. This will ensure that the the user manual is comprehensive and complete. The final user manual will then be re-written by Wannes Marynen to transform the combination of user manuals into one user manual.

3 Code comments

All code that will be written for this project will be commented by the person who wrote it. These comments will be in a doxygen format. These will contain a brief explanation of the function and the input/output variables.

Daycare & PreSchool	Cedric
Data formats	Danh & Stijn
Data visualization	Wannes
Demographic profile	Stijn
Workplace size	Cedric
Belgium simulation	Wannes & Danh
General support	Danh
